Location: Royalton, MN

Corn Test Plot

Fertilizer Comparison

	Control	10-34-0	Feast® 8-16-11w2S
Yield, BPA	165.1	170.8	192.9
Yield Advantage		+5.7 BPA	+27.8 BPA

Starter fertilizers get the crop off to a strong start, especially in cold soils. 10-34-0 gave a nice increase in this test, but Feast 8-16-11-w/2S gave a HUGE increase. With Feast 8-16-11-w/2S you get additional potassium and sulfur that are designed to be seed safe and low salt, along with 100% orthophosphate, made from virgin, clear raw materials. Not only was Feast 8-16-11-w/2S 27 BPA better than the control, it was 22 BPA better than 10-34-0! Remember it is not Lowest Cost per acre; it is Lowest Cost per bushel that makes you profit!
