

# FEAST® MICRO MASTER™

C H E L A T E D   S E C O N D A R Y   N U T R I E N T

- Fully chelated in a form readily available to plants
- Can be soil or foliar applied
- Use in combination with either liquid or dry fertilizers
- Compatible with most pesticides

For further information see back panel.

## KEEP FROM FREEZING

**Important:** Consult manufacturer for pertinent product information at <http://www.conklin.com/agrovanantage/docs>

## WARNING

**Harmful if swallowed or inhaled. Causes eye and skin irritation.**

**Precautions:** Avoid breathing mist, vapors and spray. Use only outdoors or in a well ventilated area. Do not eat, drink or smoke when using this product. Wear gloves, safety glasses or goggles, and long-sleeved clothing when handling. Wash hands thoroughly after handling.

**Response/First Aid:** If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. If swallowed: Call a physician

2.5%  
Magnesium  
EDTA Formula

or Poison Control Center if you feel unwell. Rinse Mouth. If on skin: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice or attention. Immediately take off all contaminated clothing and wash it before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing.

**NOTICE:** This product is intended to be used to correct magnesium deficiency in crops. Use of this product will not result in soil pH adjustment. Consult soil test results for appropriate liming materials and recommendations.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

### Application Guide

**SOIL:** Two to four pints per acre as needed.\* Feast<sup>®</sup> Magnesium EDTA can be applied alone, with fertilizers or in combination with most pesticides. For most effective treatment, apply in combination with starter fertilizer at planting or shortly after as a sidedress.

**FOLIAR:** One half-pint to two pints per acre. When applied with ground application equipment, use no more than 10 gallons of total spray solution per acre. When applied with aerial application equipment, use no more than 5 gallons per acre of total spray solution. A quality wetting agent such as Saturall 85<sup>®</sup> or Rain-Fast<sup>®</sup> may be used to ensure even coverage. **NOTE:** If label directions are not followed for foliar applications, phytotoxicity may occur. **Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.**

Wisconsin Users: Refer to supplemental sheets listing situations where soil test levels are low to very low for magnesium, and Wisconsin appropriate application rates.

\*Optimal rates can vary depending on soil conditions, extent of deficiency, type of crop and other factors. Conklin Company Inc. recommends the use of AgroVantage<sup>®</sup> soil and/or plant tissue analysis to accurately determine the quantities of any nutrient to be applied.
