

FEAST[®] PREMIUM PLUS with Slow Release Nitrogen

L I Q U I D T U R F F E R T I L I Z E R

28-0-0 Commercial Grade

- Contains slow release water soluble nitrogen sources – greener turf for longer periods.
- Contains no phosphorus – will not cause increased phosphate levels in surface water sources.

GUARANTEED ANALYSIS:

TOTAL NITROGEN (N) 28.00%

16.06% Urea Nitrogen

11.94% Slowly Available Water Soluble Nitrogen*

Plant nutrients derived from **triazone, urea-triazone solution, methylenediurea and dicyandiamide

* 11.94% slowly available nitrogen from **triazone, urea-triazone solution, methylenediurea and dicyandiamide

** triazone (s-tetrahydro triazone) is a synthetic, water-soluble nitrogen source

F048

DIRECTIONS FOR USE: Feast[®] Premium Plus[™] utilizes triazone nitrogen. It can be applied either undiluted or diluted with water or other liquids, using a hand gun or spray boom, and is compatible with many phosphorus, potassium and micronutrient sources as well as many turf protection chemicals (Sevin Sprayable and 2, 4-D Amine pesticides are not compatible). It is recommended that any proposed combination be tested for compatibility in a "jar test" prior to tank combination. **Each gallon contains 2.85 pounds of nitrogen (45 fluid ounces equals one pound of nitrogen).**

Feast Premium Plus can be applied as a spray application on cool, transitional and warm season turf grasses. The list includes lawns, athletic fields, sod fields, golf course fairways, greens and tees. Depending on type of grass or application, use the recommendations found in charts to right or consult state extension service for N rate and recommendations.

NOTE: Test small area of turf for possible injury prior to use, particularly at the higher rates. Injury can occur on turf when certain weather and crop conditions are present (such as hot, dry conditions). Higher rates are less likely to cause burn to turf during cool, wet weather. Burn usually occurs within one to three weeks. The user assumes all risks of use or handling.

MIXING PROCEDURE: To a tank one-half full of water (start recirculating), add Feast Premium Plus and N:P:K fertilizer blends. Then add in this order – compatible micronutrients, flowables, emulsifiable concentrates, and soluble powders and/or water soluble fertilizers. Complete filling of spray tank to desired volume and continue circulating prior to application.

HANDLING AND STORAGE: Store out of the sun in an area of moderate temperature. DO NOT store at temperatures over 100° F (38° C) for prolonged periods of time. Store in fiberglass, stainless steel, polyethylene or mild steel. Avoid containers, piping or fittings made of copper-bearing alloys or galvanized metal. DO NOT reuse container. Dispose of containers properly after thoroughly flushing with water a minimum of three times. Keep spills from waterways and sewers.

Information regarding the contents and levels of metals in this product is available on the Internet at www.aapfco.org/metals.htm

Turf Type	Pounds Nitrogen per 1,000 sq. ft. per application	Maximum Pounds Nitrogen per year per 1,000 sq. ft.
Cool season grasses	½ to 1 lb.	3 ½ to 4 lbs.
Warm season grasses	¾ to 1 lb.	6 to 8 lbs.
Golf greens & tees	Dilute ¼ lb. of nitrogen in 2 to 4 gal. water	Apply dilution at 7 to 10 day intervals

One (1) gallon of Feast[®] Premium Plus[™] covers 2,850 sq. ft. to achieve maximum of one (1) pound Nitrogen per 1,000 sq. ft. (see chart).

DO NOT apply near water, storm drains or drainage ditches. DO NOT apply if rain is expected. Apply this product only to turf and/or lawns.

Desired Applied nitrogen Lb. rate (Lbs./1,000 sq. ft.)	Feast Premium Plus application rate (Fluid ozs./1,000 sq. ft.)	Feast Premium Plus coverage rate (sq. ft. per gallon at this rate)
0.1	4.5	28,500
0.2	9.0	14,250
0.25	11.25	11,400
0.3	13.5	9,500
0.33	14.85	8,550
0.4	18.0	7,125
0.5	22.5	5,700
0.6	27.0	4,750
0.66	29.75	4,280
0.7	31.5	4,070
0.75	33.75	3,800
0.8	36.0	3,565
0.9	40.5	3,166
MAXIMUM 1Lb. N	45 fluid oz.	2,850 sq. ft.

To obtain optimal product performance, Feast Premium Plus application intervals are recommended every **eight to 12 weeks**. Initial application starts in the spring, when first green-up occurs.

WARNING

Harmful if swallowed or inhaled. Causes eye irritation.

Precautions: Avoid breathing mist, vapors and spray. Use only outdoors or in a well ventilated area. Do not eat, drink or smoke when using this product. Wear gloves, safety glasses or goggles, and long-sleeved clothing when handling. Wash hands thoroughly after handling.

Response/First Aid: If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. If swallowed: Call a physician or Poison Control Center if you feel unwell. Rinse Mouth. If on skin: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice or attention. Immediately take off all contaminated clothing and wash it before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing.

Causes damage to Blood, and Skin through prolonged or repeated exposure.
