

2019 Test Plot Data | Cadiz, KY - Corn

Population: 31,500

Planting Date: 4/15/2019

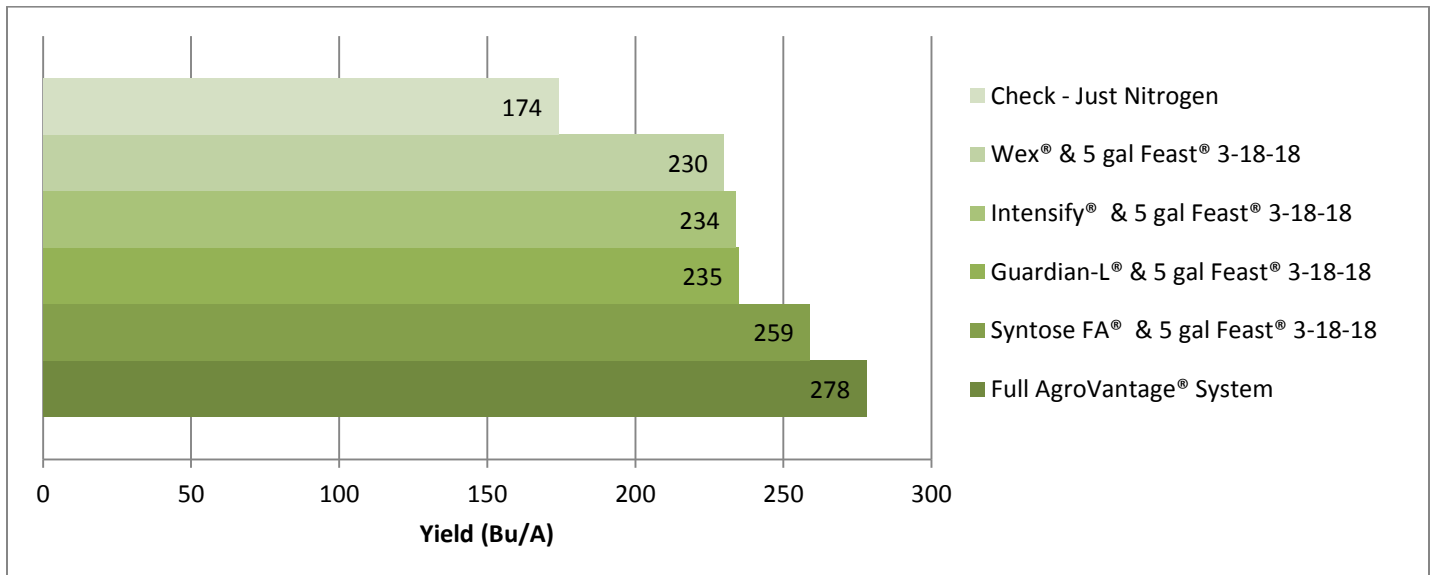

Harvest Date: 9/23/2019

Starter Fertilizer Results

This data proves that not all starter fertilizers are made the same! In this field comparison, 5 gallons of Feast® 3-18-18 placed in-row outperformed competitive starter fertilizers Insta Gro by 61 Bu/A, and Security Seed by 42 Bu/A. The test strip that was provided the full AgroVantage® System yielded a whopping 278 Bu/A yield!

Companion Products Results

Conklin offers a variety of companion products that can be added to almost any program to help increase crop yield. Although using our Feast® starter fertilizers alone delivers a consistent yield increase, adding companion products like Intensify® and Syntose FA® can build on those gains even more!
