Guaranteed Analysis:

Soluble Potash (K₂O) 25.0%
 Sulfur (S)..... 17.0%
 Nutrients from Potassium Thiosulfate
 Weight per gallon 12.2 pounds
 Florida license #FO48

Directions for Use: Feast[®] Side-Kick[™] can be applied either undiluted or diluted with water or other liquids. It is compatible with many liquid fertilizers and protection chemicals; however, it is recommended that any proposed combination be tested for compatibility in a jar test prior to large-scale tank mixing.

Mixing Procedure: To a tank one-half full of water, add Feast Side-Kick. Then add in this order – compatible micronutrients, flowables, emulsifiable concentrates, and soluble powders and/or water soluble fertilizers. Complete filling of spray tank to desired volume and continue circulating prior to application.

Limited Guarantee: Conklin Company Inc. guarantees that this product conforms to the chemical description on the label and is designed and suitable for the specific applications stated on the label. No other warranties are expressed or implied.

For US Health Hazard Information, call 1-888-786-0974.

Application Guide

SOIL: One to four quarts per acre as needed. * Feast Side-Kick can be applied alone, with fertilizers or in combination with most pesticides. For most effective treatment, apply in combination with starter fertilizer at planting or as a sidedress shortly after.

FOLIAR: One to two quarts per acre. When applied with ground application equipment use no more than 10 gallons of total spray solution per acre, when applied with aerial application equipment use no more than 5 gallons per acre of total spray solution. A quality wetting agent such as Saturall 85[®] or Rain-Fast[®] may be used to insure even coverage.

NOTE: if label directions are not followed for foliar applications, phytotoxicity may occur. **Foliar fertilization is intended as supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.**

*Optimal rates can vary depending on soil conditions, extent of deficiency, type of crop and other factors. Conklin Company Inc. recommends the use of AgroVantage[®] soil and/or plant tissue analysis to accurately determine the quantities of any nutrient to be applied.
