### BE READY FOR SPRING PLANTING WITH AGROVANTAGE SYSTEM PRODUCTS

Spring has officially arrived, and it's time to start planting your crops. The AgroVantage System of products is here to improve your yields and return on investment with pre-plant products. Pre-planting activities serve as the foundation on which farmers can build upon the success and survival of their crops. For many, their entire farming program relies on pre-planting operations.

#### Pre-plant Products

Conklin's AgroVantage System offers a variety of pre-plant products to fit each farmer's specific needs. **Wex®**, **Rain Fast®**, **Home Run®**, **Bulls Eye®**, and other adjuvants are commonly used with early spring "burndown" or residual herbicide applications. These sprays are intended to kill off winter annual weeds or cover crops that have grown in the winter and spring, or prevent annual summer weed seeds from germinating in the spring.

While Wex, Rain Fast, and Home Run are surfactants that allow herbicides to better penetrate the leaves of weeds for better results and weed kill, Bulls Eye works as a drift retardant/reducer. When combined with herbicides, Bulls Eye will increase the size of spray droplets, reducing the potential for spray drift and ensuring that herbicides stay on-target and not in your neighbor's field.

#### Seed Treatments

**Magnify® LST**, **Amplify-D®**, and **Amplify-L®** are especially important to have on hand when it comes time to plant. Amplify-D can be applied to seed as a planter box treatment, but Amplify-L and Magnify LST are liquid-applied seed treatments, with Magnify LST having the option of being applied in-furrow with water.

#### Starter Fertilizers

In-furrow, splitter, and other planter-placed fertilizers such as **Feast® 3-18-18** and **Feast® Side-Kick™ 0-0-25 w17S** must also be ready when it comes time to plant. Make sure you time your orders right to ensure starter fertilizers are available for application in one of the most efficient methods possible.

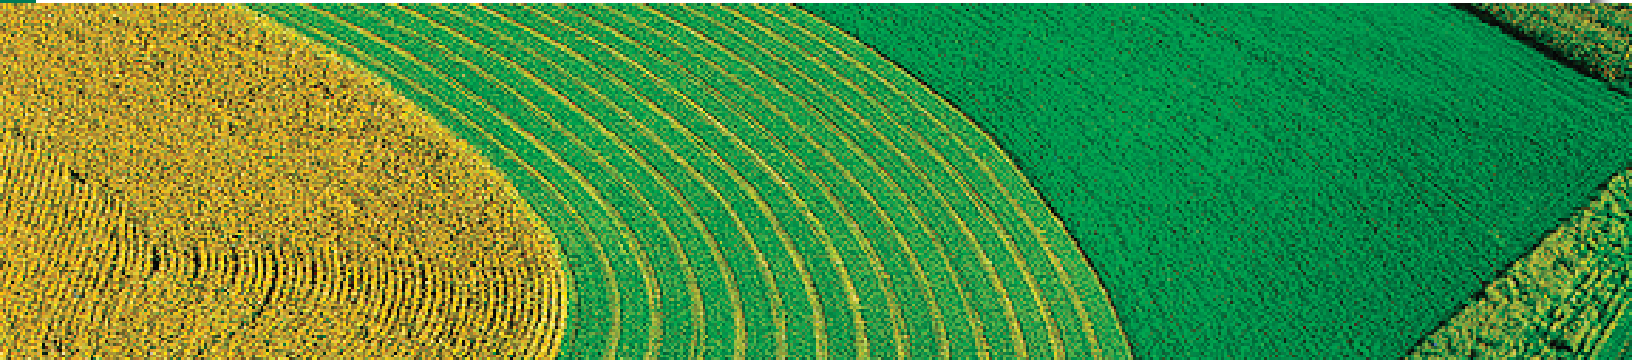

### QUESTIONS FOR FARMERS AND AGROVANTAGE CUSTOMERS

1. Have you built a good relationship with your AgroVantage Distributor? Communication is key.
2. Are all your questions answered? For example, do you know how to check the health of your soil?
3. Have you sat down and discussed your farming operation's needs with your AgroVantage Distributor?

### RELY ON RHINO® FOR YOUR PLANTING EQUIPMENT

Keep your planting equipment where you need it this spring: in the field! To help gears run smoothly with fewer breakdowns, proper maintenance and greasing will go a long way. **Rhino #2 Parasynthetic Lithium Complex Grease with Moly**, one of the go-to **Conklin Vehicle Products**, provides ultimate protection under severe conditions, such as heavy loads you can experience during planting. Rhino pumps easily in cold temperatures, resists breakdown, and is great for planters, seed tenders, wheel bearings, and chassis grease applications. Rhino will last longer, reducing maintenance time and costs. Spend time this season in your fields where you want and need to be!

- #047480 10 - 14-oz. tubes (case)
- #047423 35 lbs.
- #047431 120 lbs.

If you're busy running and don't have time for maintenance, you definitely have an insurance policy in Rhino. Your downtime and maintenance is going to be dramatically reduced.  
- Regional Director Verlin K., CO

My dad has heavy operating equipment, like a dozer, an earthmover, and a soil-moving machine. Whenever he puts Rhino grease on anything, he says it stays there, it stays put.  
- District Manager Todd H., NE

## LISTEN UP! NEW AGROVANTAGE SYSTEM CONFERENCE CALL SERIES

Conklin AgroVantage Marketing Manager Dan Willgohs and AgroVantage Products Specialist Isaiah Akers recently kicked off a series of twice-monthly conference calls focusing on AgroVantage System products on the second and fourth Tuesday of each month at 7 p.m. CDT, now through May 26. Tune into these informative calls on the dates shown below by dialing (862) 777-9700 and entering the eight-digit pass code 93599359#.
