Bull's-Eye™

Drift Management/Deposition Aid

DESCRIPTION

Bull's-Eye is an effective, easy to use spray additive for use in managing chemical drift and spray deposition. It is compatible with most water soluble and wettable powder pesticides.

PERFORMANCE CHARACTERISTICS

- Increases surface tension of agricultural solutions to form larger, more uniform droplets
- Reduces drift to non-target areas
- Increases percentage of material to target plants
- Improves pesticide efficiency and effectiveness

PRODUCT CHARACTERISTICS

- Highly concentrated formulation
- More economical – less chemical lost
- Easy to mix
- Safe to handle and use

DIRECTIONS FOR USE

Fill tank with water and pesticide mixture and begin to agitate. Shake container of Bull's-Eye **well** before adding to this mixture. **Slowly** add Bull's-Eye to a **rapidly agitating** tank mix, pouring a **pencil thin stream** into the area of **highest turbulence**. Continue to aggressively agitate the tank mix for at least two minutes before spraying.

SPECIFICATIONS

Part number

055244	Single quart
055251	12-quart case

Guaranteed analysis:

Polyvinyl Polymer (Polyacrylamide)	30%
Inert ingredients	70%

Appearance

White, milky liquid

pH

4 – 6

Specific gravity

1.0

Weight/U.S. gallon

8.34

Freezing point

Approximately 32°F

Packaging

1 quart plastic container
 12-quart case – 1 quart plastic container (12 per case)

Storage/Handling

Keep from freezing
