

Specification Sheet

4-Power® Starter Fluid

*Premium starter fluid formula
with added lubrication*

Benefits

- Added lubrication to reduce wear during start-up conditions
- Premium formula for quick, smooth starts
- Performs in the coldest conditions, down to -40 degrees F
- For use in all 4 seasons - Winter, Spring, Summer, and Fall to promote extended battery life and reduced wear on starters

Description

Conklin's 4-Power Starter Fluid with lubrication is a premium starter fluid formulated to deliver enhanced starting strength, promoting quick and smooth starts in gasoline and diesel engines in all kinds of weather. The added lubrication protects your engines from increased wear during start-up conditions, while saving your battery life. 4-Power Starter Fluid with lubrication is for use in 2 and 4 stroke gasoline and diesel engines including cars, trucks, lawn mowers, weed eaters, chain saws, marine engines, tractors and motorcycles.

Directions – Read entire label before use

Before making attempts to start the engine, hold can upright and spray Conklin's 4-Power Starter Fluid with lubrication in a short 2-3 second burst, then start the vehicle or equipment.

NOTE: Do not spray 4-Power Starter Fluid with lubrication while attempting to start an engine. Do not use in diesel engine with glow plugs.
