HOW TO CALCULATE THE ROOF SURFACE OF A QUONSET ROOF

FORMULA: **π X Height X Length**
         π = 3.14

         Height = 16'

         Length = 120'

EXAMPLE: **3.14 x 16 x 120 = 6,028.8 sq feet**

****DON'T FORGET TO ADD 20% FOR THE CORRUGATED STEEL****

FINAL RESULTS: **6,028.8 x 1.2 = 7,234.56 Total sq feet**
