

# FLEXIBILITY OF CONKLIN ROOF COATINGS

## Benchmark<sup>®</sup>, Rapid Roof III<sup>®</sup> and PUMA<sup>®</sup> XL

- Superior elongation and tensile strength to withstand expansion and contraction caused by temperature extremes
- V.O.C. compliant – water based (not harmful to the environment)
- Energy efficient – highly reflective
- Lightweight
- Proven long-lasting performance

---

## Demonstration of Flexibility of Conklin Roof Coatings

- Purpose:** To demonstrate the flexibility of coating systems.
- Materials needed:** Film samples Rapid Ply #78508, Bench Ply #78292 and Value Ply #78377 are available through Conklin distribution centers.
- Prior to demonstration:** Wet film thickness gauge (available through Conklin distribution centers). To make film samples: Obtain 1" x 3" pane of glass. Clean the glass and lightly coat with an aerosol nonstick cooking spray (Pam). Apply system of choice per spec sheet.
- For the demonstration:** Allow 2 to 5 minutes
- Introduce the system and its benefits and share testimonials.  
Roll up sample, bend, twist, pull, tug – do whatever you can with the sample piece. This can also be done with competitive products.
