

INHIBODOR[®]

ANIMAL WASTE TREATMENT

DESCRIPTION

INHIBODOR is a concentrated extract, derived from the *Yucca schidigera* plant, for use in livestock waste systems. A well-managed waste facility has minimal odors, is easily emptied and provides an environment for efficient livestock production. INHIBODOR is designed to bind ammonia and create conditions which can improve the pumpability of your livestock waste. For use in confinement pits and lagoons, poultry litter, horse stalls and dog kennels.

PERFORMANCE CHARACTERISTICS

- Binds ammonia and other noxious gases
- Retains more plant nutrients in animal waste
- Reduces odors
- Enhances liquefaction and slurry pumpability
- Easily applied
- Versatile – for use in all types of animal facilities

PRODUCT CHARACTERISTICS

- Contains *Yucca schidigera* plant extract
- Soluble in water
- Concentrated formula
- Non-corrosive
- Conveniently packaged in one gallon containers

DIRECTIONS FOR USE

Dilute with appropriate amount of water and apply directly to slurry or litter. Consult label for specific rates of application.

CAUTION: Appropriate protection is always necessary when working with manure handling systems. Refer to label for information on precautionary statements and first aid.

SPECIFICATIONS

Part number

054940 Gallon

Guaranteed Analysis

Yucca schidigera plant extract 25 percent

Appearance	dark brown liquid
pH	3.9
Specific Gravity	1.06
Viscosity	10 cps
Freezing Temperature	28° – 32° F
Weight /US gallon	8.80 pounds
Packaging	1 gallon plastic container
