Test Weight, lbs.	55.7	55.7
Advantage		+ 5.06

Adding a starter fertilizer to a crop production program is a good decision and typically provides good return on investment. The AgroVantage System takes it a step further; we add the micronutrients indicated by a soil analysis to ensure fewer limiting factors and improved return on investment. In this trial, paying attention to the details and applying the nutrients in an efficient manner provided an additional 5 BPA!
