

Feast® Starter Fertilizers

CONKLIN® AgroVantage
SYSTEM

Jump Start Your Crops

Feast® starter fertilizers are the highest quality starter fertilizers in the industry. Conklin's fertilizers start with superior raw materials to produce an exceptional finished product. Unlike most fertilizers in the industry, Feast is an absolutely clear liquid, true solution with no impurities and has a low salt index with 100 percent orthophosphate. Ultra low-biurct urea, furnace-grade white phosphoric acid, premium potassium hydroxide, and pure aqua ammonia sources are used in these specifically formulated fertilizers

Benefits of Feast Starter Fertilizers:

- Over thirty years of consistent research and field-proven results
- Non-corrosive to equipment
- Effective at low application rates

The Quality Advantage

Plants require certain key nutrients – phosphorus in particular – early in the growth cycle. The plant-usable orthophosphates in Feast fertilizer give your germinating plants a big advantage, especially during a cold, wet spring.

The premium raw materials in Feast are blended in an exclusive hot mix process that produces a homogenized, clear liquid fertilizer that is stable at temperature extremes, non-corrosive, low in salt and impurities, near neutral in pH and highly recoverable to the plant.

Feast starters are available in five popular formulas: 9-18-9, 8-24-0, 3-18-18, 2-15-19 w/3S, and 8-16-11 w/2S. Fortify your starter mix with Side-Kick 0-0-25 w/17S.

The Placement Advantage

A Feast liquid fertilizer placement program increases your efficiency by putting a smaller amount of fertilizer on or near the seed at planting, to minimize soil tie-up. While broadcast feeds the soil, Feast feeds the crop. Placement of a concentrated liquid starter like Feast means better nutrient utilization and more efficient use of your fertilizer dollars.

The Yield Advantage

One Midwestern field trial on corn demonstrated that Feast 3-18-18 applied at 4 gal./acre in-row generated \$19 more profit per acre than 50 lbs./acre dry broadcast P & K.

Feast® Starter Fertilizers

The Research Advantage

The Conklin Company has tested the performance of Feast liquid fertilizer on corn, wheat, soybeans, alfalfa, milo, cotton and other crops for over 30 years. Independent trials and company-sponsored regional ag test plots have shown Feast to consistently outperform competitive fertilizer programs.

9-18-9

- #7161 55 gallon drum
- #7190 250 gallon mini-bulk
- #7112 Bulk

3-18-18

- #7278 5 gallon (in two 2½ gallon containers)
- #7260 55 gallon drum
- #7300 250 gallon mini-bulk
- #7211 Bulk

8-24-0

- #40188 Bulk

2-15-19 w/3S

- #41555 250 gallon mini-bulk
- #42640 Bulk

8-16-11 w/2S

- #40550 250 gallon mini-bulk
- #40568 Bulk

Side-Kick 0-0-25 w/17S

Fortify your liquid starter foliar and side-dress mixes

- #38690 5 gallon (in two 2½ gallon containers)
- #38711 55 gallon drum
- #38750 220 gallon mini-bulk
- #38737 Bulk

AgroVantage is part of the family of Conklin products designed to save fuel, energy, time and money so you can work smarter, live better. Opportunities are available to start your own Conklin business.

CONKLIN® AgroVantage
SYSTEM

"For three years, I have consistently increased my corn yields 12-18 bushels per acre using Feast 3-18-18 with Side-Kick."

– Gary Porter, Missouri
NCGA National Corn Yield Champion
