

"I'm proud to be in business with a farmer-owned company whose owners demand quality, and truly have a heart for agriculture and preserving the family farm."

– Jay M., North Dakota

It's time to incorporate Conklin's agricultural products into your operation.

**Reduce crop inputs while increasing yields**

The National Corn Growers Association has presented awards to over 200 top producers who have incorporated Conklin's AgroVantage crop management system into their operation. But you don't have to compete to take advantage of higher yields, hardier crops and long-term sustainability.

**Maximize the performance of your livestock**

Fastrack-fed animals are setting the pace for producers around the world. Incorporate Fastrack's natural advantages into your feed and management programs to stimulate production, performance, enhance health and achieve higher profits.

**Start growing bigger profits**

Conklin has several ways you can get started today. First choose your discount level (wholesale or preferred), and then choose your package. Complete our Customer Registration Form with your sponsor and place your first order.
