

Glyphosate Support Program

Control Weeds and Feed Your Soybeans To Increase Yields

The combination of the AgroVantage® adjuvants and Feast® Chelated Manganese enhances your glyphosate program for increased soybean yields.

Bull's-Eye® *Drift Retardant/Deposition Aid*

Maximize spray effectiveness by keeping spray solution on targeted plants

- Creates larger, more uniform droplets for canopy penetration
- Drifts less for greater plant coverage

Complete™ *Liquid AMS/Drift Retardant*

Contains highest level liquid form of high-quality, spray-grade AMS

- Modifies water hardness for glyphosate effectiveness
- Handles and blends easier in liquid form
- Less plugging problems than dry AMS
- Contains a drift retardant/deposition aid

Rain-Fast® *Wetting Agent/Spreader/Penetrant/Surfactant*

Maximize herbicide and foliar feeding by keeping solution on target plants with spray solutions

- Superior leaf wetting
- More effective spreading
- Better penetration

Feast® *Chelated Manganese*

Reduce yield reduction associated with yellow flash induced by glyphosate application with 6% Manganese EDTA-chelate

- Research-documented yield increases by foliar feeding Manganese at time of glyphosate application
- Organically chelated for tank mix stability
- Compatible with tank mixes containing glyphosate

AgroVantage is part of the family of Conklin products designed to save fuel, energy, time and money so you can work smarter, live better. Opportunities are available to start your own Conklin business.
