- Show Animals
- Commercial Market Animals

# SHEEP & GOAT PROGRAMS

## The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

## Fastrack Products

### Fastrack Liquid Dispersible

This dispersible powder was created for lambs and kids to help improve their over all health by aiding the immune system and increasing nutrient absorption.

### Fastrack Jump-Start™ Gel Ultra

Help establish a healthy gut microbiome from the start with specialized proteins and beneficial bacteria.

### Fastrack NutriLift®

Formulated to help boost the immune system of lambs or kids with specialized proteins and beneficial bacteria.

### Fastrack Microbial Pack PRO

Formulated with the original formula of Fastrack Microbial Pack, the Fastrack Microbial Pack PRO contains additional next generation ingredients to further promote animal health and production.

### Fastrack Ruminant Microbial Gel Ultra

Help re-establish balance of beneficial bacteria, support and enhance immune function, and drive appetite.

### Birth and Bottle Feeding

10 mL of Jump-Start™ Gel Ultra at birth, followed up daily for 2-5 days.

Starting with bottle feeding, 2g. of NutriLift® per lamb or kid daily for 10 days, followed by 2g. of Liquid Dispersible per kid or lamb until weaning.

### Weaning

Mix into or top-dress dry feed at minimum one week prior to weaning the lamb or kid at a rate of 1 oz. per day of Microbial Pack PRO.

10 mL of Jump-Start™ Gel Ultra when the kid or lamb is experiencing antibiotic treatment or periods of irregular feed intake.

### Maturity

Mix or Top-dress Microbial Pack PRO at a rate of 0.5-1 oz. daily per animal.

5-10 mL of Ruminant Gel Ultra when undergoing stress or irregular feeding.
