# DEER PROGRAMS

## The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

## Fastrack Products

### Fastrack Jump-Start™ Gel Ultra

Help establish a healthy gut microbiome from the start with specialized proteins and beneficial bacteria.

### Fastrack NutriLift®

This dispersible powder was created for young fawns to help boost their immune system with specialized proteins and establish a healthy gut microbiome in their first few days of life.

### Fastrack Liquid Dispersible

This dispersible powder was created for calves to help improve their overall health by aiding the immune system and increasing nutrient absorption.

### Fastrack Microbial Pack PRO

Formulated with the original formula of Fastrack Microbial Pack, the Fastrack Microbial Pack PRO contains additional next generation ingredients to further promote animal health and production.

### Fastrack Ruminant Microbial Gel Ultra

Help re-establish balance of beneficial bacteria, support and enhance immune function, and drive appetite.

For more information, contact your  
Conklin Independent Distributor

### Birth

Administer 10 mL of Fastrack Jump-Start™ Gel Ultra at birth between the gum and cheek of the fawn.

### Growing Fawns

For fawns administer 5 mL of Fastrack Jump-Start™ Gel Ultra between the gum and cheek of the fawn as a maintenance dose.

Mix 2 g. of Fastrack NutriLift® per fawn daily in milk replacer for first 5-10 days.

Mix 2 g. of Fastrack Liquid Dispersible per fawn daily in milk replacer until weaning

### Weaning

For fawns administer 5-10 mL of Fastrack Jump-Start™ Gel Ultra between the gum and cheek of the fawn as needed undergoing stress.

### Mature Deer

Administer 5-10 mL of Fastrack Ruminant Microbial Gel Ultra per deer daily during periods of irregular feed intake, transporting, and giving birth.

Top-dress or mix 1-2 oz. of Fastrack Microbial Pack PRO per animal into feed, especially during breeding, lactation, and antler growth.
