

Go the Extra Mile

with Diesel Plus® Fuel Conditioner

Diesel Plus is an all-in-one diesel fuel conditioner formulated to improve the performance of diesel engines. Today's Ultra-Low Sulfur Diesel fuel (ULSD) lacks the lubrication necessary to properly lubricate injectors and fuel pumps. This lack of lubrication leads to costly repairs such as replacing fuel injectors and fuel pumps. Diesel Plus with soy adds back the lubrication lost with

A Cleaner Fuel System

As fuel oxidizes, it can chemically change into gum and varnish. They deposit on injectors and on valves, reducing the engine's fuel efficiency, creating loss of power and high emissions. Diesel Plus' superior L-10 detergency rating provides excellent fuel system cleaning to maintain peak performance and increase fuel economy.

Dependable Cold-Weather Performance

Cold weather puts a lot of stress on diesel vehicles. As the outside temperature decreases, diesel fuel will begin to gel, clogging the fuel filter. Water present in the fuel can also freeze the line. Diesel Plus will improve winter starting and performance by lowering the fuel gel point as much as 35° F and decreasing the cold-filter plugging point as much as 22° F. It also contains a de-icer that helps to prevent fuel line freezing.

Benefits

- Lowers CFPP as much as 22° F
- Drops gel point as much as 35° F
- Improves winter performance
- Protects against harmful corrosion
- Stabilizes fuel
- Extends the life of injectors and fuel pumps
- Improves fuel efficiency
- Increases Cetane number by as much as 4
