

Conklin's National and Regional Test Programs

Conklin has been experimenting and testing its premium agronomic products at a National Research Plot and at regional test plots across the country for many years. These plots have provided the research needed to successfully develop high-quality, top of-the-line products for the AgroVantage® division. Year after year, the plot research proves the performance of the AgroVantage products and testing is completed to ensure they continue to perform. Following is a summary of one of Conklin's regional test plots.

Trial Treatments:

Check: No Amplify-D®
 Seed Treatment: Amplify-D®
 2oz/50 lbs. seed

Yield: bu/ac

148.5
 149.8

Amplify-D® seed treatment is proprietary to the Conklin Company. This blue powder, containing adenosine monophosphate, has proven to encourage uniform plant emergence and stand. At harvest, this means higher yield. In this study, a \$3.00 per acre investment in Amplify-D resulted in an 1.3 bu/acre increase. Please use your projected corn price to determine the return-on-investment in Amplify-D.

Trial Treatments:	Yield Bu/Ac
Check	142.1
Feast 3-18-18 @ 5 gal/A + 1gal SK in row + 2 gal/A 2x2	154.7

Feast® SideKick® is the perfect complement for any starter program. The 0-0-25+17%S material provides the essential element sulfur for a balanced and fast start. In this study adding 1 gallon of SideKick in row and 2 gallons 2 x 2 helped Aaron Meader to gain 12.6 bushels per acre with an investment of about \$10.80 per acre.

Trial Treatments:	Yield Bu/Ac
Check	139.7
Feast® 3-18-18	146.2
Feast® 3-18-18 + 1 gal SideKick®	152.1

Feast starter fertilizers start with the highest quality raw materials to produce a superior finished product. Unlike most fertilizer in the industry, Feast is an absolutely clear liquid, true solution with no impurities and has a low salt index with 100 percent orthophosphate. Only low-buret urea sources are used in these specifically formulated fertilizers. This study shows a 6.5 bushel/acre increase with Conklin's Feast 9-18-9. Feast® SideKick® is the perfect complement for any starter program. The 0-0-25+17%S material provides the essential element sulfur for a balanced and fast start. In this study adding 1 gallon of SideKick helped Aaron to gain 5.9 bushels per acre on an investment of about \$3.60 per acre.

Yield Bu/Ac

Check	142.1
Feast® 10% Boron	155.2
Feast® 9% Zinc	153.2

All of Conklin's Feast® micro and secondary nutrients are unsurpassed in consistency, purity and nutrient availability. Feast micronutrients are 100 percent organically chelated using EDTA chelating agents to resist soil tie-up. These nutrients are proven to be five to ten times more efficient than inorganic sources. They are designed for co-application with starter and foliar fertilizers. In this study, by applying Zinc or Boron at the recommended rate according to soil tests, Aaron Meader realized yield increases of 11 to 13 bushels per acre.

	according to Midwest Laboratories Soil Test

Conklin's exclusive AgroVantage® System is cost effective and continues to show measurable results. Designed to deliver the kind of production advantages modern agriculture demands, the AgroVantage System will help to reduce your application costs while increasing yields. Featuring a complete line of products that complement crop management programs, this System will maximize the genetic potential of your crops. In this study, Aaron Meader realized a yield increase of 6.8 bushel/acre using the AgroVantage System. Use your projected corn price to determine the return-on-investment in using this System.
