### Conklin's National and Regional Test Programs

Conklin has been experimenting and testing its premium agronomic products at a National Research Plot and at regional test plots across the country for many years. These plots have provided the research needed to successfully develop high-quality, top-of-the-line products for the AgroVantage® division. Year after year, the plot research proves the performance of the AgroVantage products and testing is completed to ensure they continue to perform. Following is a summary of one of Conklin's regional test plots.

Conklin's exclusive AgroVantage® System is cost effective and continues to show measurable results. Designed to deliver the kind of production advantages modern agriculture demands, the AgroVantage System will help to reduce your application costs while increasing yields. Featuring a complete line of products that complement crop management programs, this System will maximize the genetic potential of your crops. In this study, Russ realized a yield increase of nearly 35 bushels/acre using the AgroVantage System. Use your projected corn price to determine the return-on-investment in using this System.

3 Gal Feast® 9-18-9

59.1  
65.3

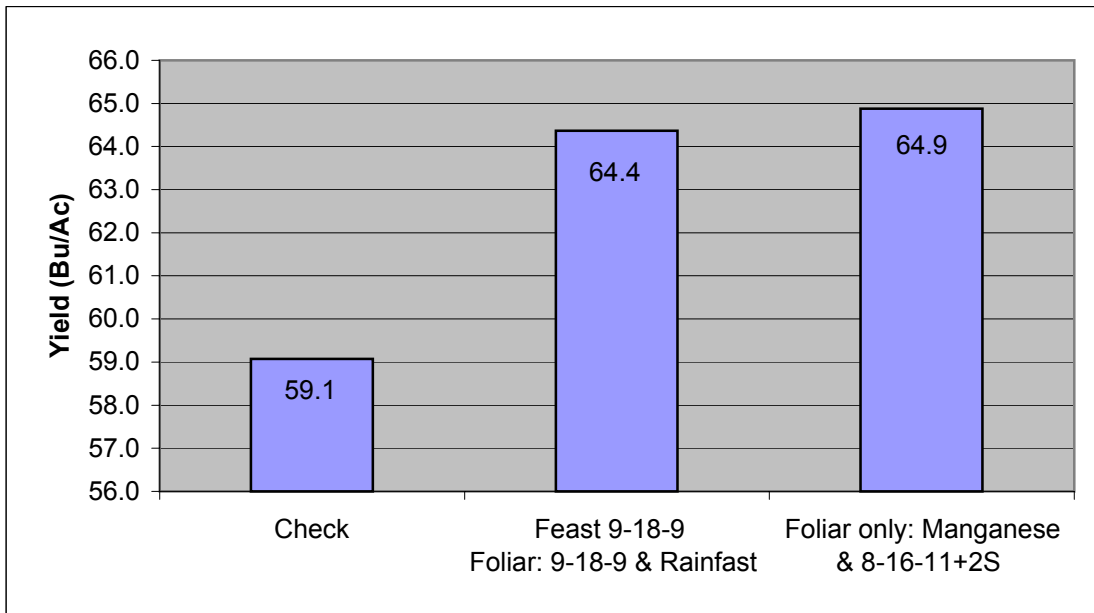

Feast starter fertilizers start with the highest quality raw materials to produce a superior finished product. Unlike most fertilizer in the industry, Feast is an absolutely clear liquid, true solution with no impurities and has a low salt index with 100 percent orthophosphate. Only low-buired urea sources are used in these specifically formulated fertilizers. This study shows a 6.2 bushel/acre increase with Conklin's Feast 9-18-9.

#### Trial Treatments:

Treatment	Yield Bu/Ac
Check	59.1
Starter: 3 Gal Feast® 9-18-9 Foliar: 3 Gal Feast® 9-18-9 & Rainfast®	64.4
Foliar only: 1 Pt Manganese & 3 Gal Feast® 8-16-11+2S	64.9

Feast starter fertilizers start with the highest quality raw materials to produce a superior finished product. Unlike most fertilizer in the industry, Feast is an absolutely clear liquid, true solution with no impurities and has a low salt index with 100 percent orthophosphate. Only low-buret urea sources are used in these specifically formulated fertilizers. In addition to starter applications, Feast is recommended as a foliar fertilizer for many crops. This study shows a 5.3 bushel/acre increase with Conklin's starter and foliar applications. By foliar feeding only with Manganese and Feast 8-16-11+2S an additional 0.5 bushel increased was noticed.

SideKick® @ 1 gallon/acre	64.2

Feast® SideKick® is the perfect complement for any starter program. The 0-0-25+17%S material provides the essential element sulfur for a balanced and fast start. In this study adding 2 quarts of SideKick helped Russ Gradert to gain 3 bushels per acre on an investment of about \$3.60 per acre.
