

**Conklin's National and Regional Test Programs**

Conklin has been experimenting and testing its premium agronomic products at a National Research Plot and at regional test plots across the country for many years. These plots have provided the research needed to successfully develop high-quality, top of-the-line products for the AgroVantage® division. Year after year, the plot research proves the performance of the AgroVantage products and testing is completed to ensure they continue to perform. Following is a summary of one of Conklin's regional test plots.

**Trial Treatments:**

Check: No Amplify-D®  
Seed Treatment: Amplify-D®  
2oz/50 lbs. seed

**Yield: bu/ac**

194.7  
197.5

Amplify-D® seed treatment is proprietary to the Conklin Company. This blue powder, containing adenosine monophosphate, has proven to encourage uniform plant emergence and stand. At harvest, this means higher yield. In this study, a \$3.00 per acre investment in Amplify-D resulted in an 2.8 bu/acre increase. Please use your projected corn price to determine the return-on-investment in Amplify-D.

These plots have provided the research needed to successfully develop high-quality, top of-the-line products for the AgroVantage® division. Year after year, the plot research proves the performance of the AgroVantage products and testing is completed to ensure they continue to perform. Following is a summary of one of Conklin's regional test plots.

## FEAST

YIELD MASTER™ STARTER FERTILIZERS

#### Trial Treatments:

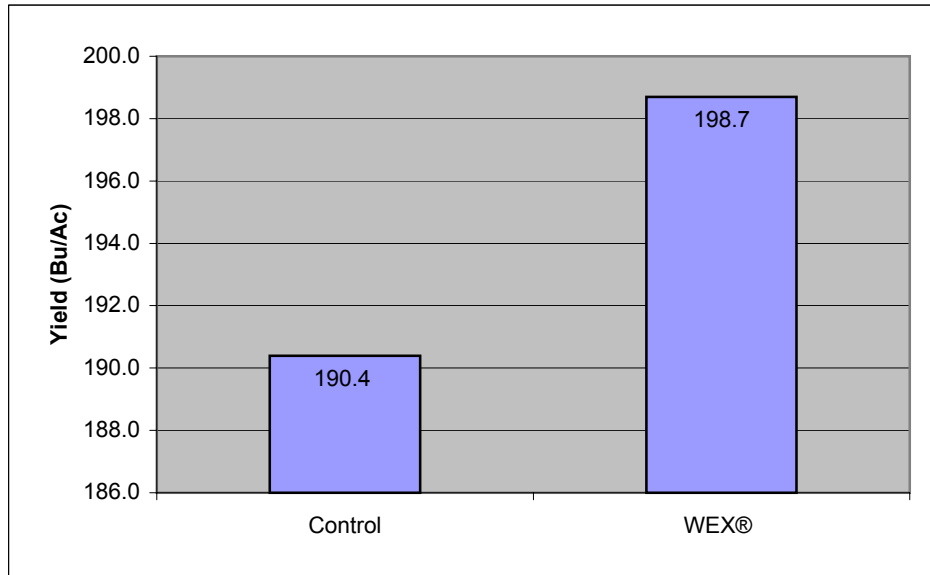

Treatment	Yield Bu/Ac
Check	192.2
Feast® 3-18-18	204.5

Feast® starter fertilizers start with the highest quality raw materials to produce a superior finished product. Unlike most fertilizer in the industry, Feast is an absolutely clear liquid, true solution with no impurities and has a low salt index with 100 percent orthophosphate. Only low-buired urea sources are used in these specifically formulated fertilizers. This study shows nearly a 12.3 bushel/acre increase with Conklin's Feast 3-18-18.

**Trial Treatments:**

Control  
WEX® @ 1 Pt/A

**Yield:**

190.4  
198.7

Wex® Multipurpose Wetting Agent maximizes the effectiveness of liquid-applied fertilizer and pesticides. The exclusive nutrient-related action (NRA) technology stimulates root development, improving water and nutrient absorption. Results include increased root mass leading to higher organic matter and higher yields. In this study, Delmar Yoder increased his yields 8.3 bushels/acre. Please use your projected corn price to determine the return-on-investment in Wex.
