

## Feast<sup>®</sup> 0-9-18 with 6%S Starter and Foliar Fertilizer

### High-Efficiency Phosphorus, Potassium, and Sulfur for Addition to Nitrogen Top-Dress or Foliar Feed Applications

#### Feast Quality and Performance

Conklin Fertilizers start with the highest-quality raw materials for superior products. Unlike most fertilizers, Feast is an absolutely clear, impurity-free liquid solution. It has a low-salt index and uses only low-biuret urea sources. Both independent trials and company-sponsored regional and national test plots have shown Feast to consistently outperform competitive fertilizer programs.

#### Features of Feast 0-9-18 with 6%S

##### Easy to Use

- Unique formulation provides 100% ortho-phosphorus that is compatible with UAN
- Compatible with most crop protection chemicals

##### Formulated for Efficiency and Effectiveness:

- Enables a 4 to 5 times efficiency in foliar applications, and a 2 times efficiency in top-dress applications
- Contains 100% ortho phosphorus for immediate plant absorption and metabolism
- Contains potassium hydroxide for potassium nutrition without the burn associated with potassium chloride
- Contains thio-sulfate for plant-available sulfur in a leaf-friendly form

##### Currently Approved for Use on Several Top-Dress and Foliar Feed Applications

- Add to UAN\* Solution for Wheat Top-Dress
- Add to UAN\* Solution for Bermuda Grass Top-Dress

*\*Top-dress – Apply a maximum of 10 gallons of 0-9-18 with 6%S per acre. If mixing with UAN, maximum concentration of 0-9-18 with 6%S should be 20% of total, e.g. 2 gallons in 10.*

*Foliar feed – Apply a maximum of 5 gallons of mixed fertilizers including a maximum of 2 gallons of 0-9-18 with 6%S per acre.*

Feast 0-9-18-6S is available only from Italy, Texas for Arkansas, Oklahoma and Texas only.
