

Performance. Value. Longevity.

Get more mileage out of your current vehicle – Conklinize it!

FUEL SYSTEM

• 4-POWER® G – FUEL SYSTEM CLEANER

Restore mileage lost from dirty fuel systems

4-Power G's formulation is designed specifically for gasoline fuel systems. It works to aggressively clean fuel system components, allowing for more efficient fuel dispersion and complete combustion.

The 4-Power G gasoline engine formula also:

Benefits

- Dissolves gums and deposits, restoring lost mileage
- Disperses water in the fuel system, protecting against corrosion
- Eases cold-weather starts by removing water from the fuel system so the lines don't freeze

• 4-POWER® D – FUEL SYSTEM CLEANER (With De-Icer)

Aggressively cleans entire fuel system, restoring fuel efficiency

A clean fuel system enables proper fuel dispersion and complete combustion, maximizing engine efficiency and performance. 4-Power D is intended for all diesel engine makes and models including those with additional emissions devices.

The 4-Power D diesel engine formula:

Benefits

- Dissolves gum and deposits, restoring lost mileage
- Protects against corrosion by dispersing water through the fuel system
- Can be used as an emergency deicer. It quickly thaws gelled fuel filters and disperses water
- Prevents fuel line freezing, easing cold-weather starts
- Is available in two convenient sizes – one for pickups and the other for over-the-road vehicles

• FUEL MATE PLUS® – GASOLINE CONDITIONER

Improves fuel efficiency by restoring and maintaining fuel system performance

Fuel Mate Plus gasoline conditioner keeps fuel systems clean to efficiently burn today's fuels. Cleaner combustion leads to smoother operation and longer, maintenance-free engine life. Fuel Mate Plus cleans existing deposits and prevents new deposits from forming. It also helps prevent fuel varnishing when storing vehicles, motorcycles, snowmobiles and watercraft in the off-season.

Benefits

- Keeps carburetors and injectors clean
- Reduces exhaust emissions
- Inhibits fuel system rust and corrosion
- Extends engine life
- Minimizes intake valve deposits

• DIESEL PLUS® – DIESEL FUEL CONDITIONER

Improves fuel efficiency while solving year-round problems associated with diesel systems

Diesel Plus Diesel Fuel Conditioner keeps your fuel systems clean for improved efficiency and longer component life. Our soy formula provides the proper lubrication needed for fuel system components that is lost by using ultra-low sulfur diesel fuel (ULSD) versus previous fuels. Diesel Plus also contains properly concentrated cold-flow improvers and deicers for reliable cold-weather starts.

Benefits

- Lowers the Cold Filter Plugging Point (CFPP) as much as 22°F
- Extends the life of injectors and fuel pumps
- Contains antioxidants to improve diesel fuel stability and storage life

MOTOR OIL

• CONVOY® – PARASYNTHETIC MOTOR OIL

*Extends oil changes up to 15,000 miles**

Convoy extends oil drain intervals three to five times longer than manufacturer's recommendations. And extended oil changes help save you money! Convoy's uniquely formulated parasynthetic oil blends higher quality base oils and includes quality conventional oil, highly refined synthetic oil, a laboratory designed and manufactured PAO (Poly alpha Olefin) synthetic oil that's free of impurities and the best friction-reducing additive available, Molybdenum.

Benefits

- Increases fuel efficiency
- Reduced friction
- Keeps engine clean and free of power robbing sludge and deposits
- Cold and high temperature durability
- Available in various weights and viscosities

*An oil analysis is advised at manufacturers' recommended drain intervals; always change your oil filter at this time.

• TKO® – Engine Oil Treatment

*Extend the life of your conventional oil or deep-clean before switching to Convoy**

TKO is a balanced conventional oil treatment that fortifies engine oils to improve their durability and performance – keeping them running cleaner, quieter and longer. TKO provides the necessary additives to extend the life of engine oil. It improves the engine oil's anti-wear, detergency and solvency properties. It also increases the engine oil's ability to perform at high temperature for extended periods.

Benefits

- Improves oil viscosity, lubricity and film strength
- Increases thermal stability and durability
- Minimizes gum, sludge and varnish deposits
- Provides anti-corrosion protection

*TKO should never be used with a parasynthetic or full synthetic motor oil.
