# CHICKEN PROGRAMS

## The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

## Fastrack Products

### Fastrack Liquid Dispersible

This dispersible powder was created for young and adult chickens to help improve their overall health by aiding the immune system and increasing nutrient absorption.

### Fastrack Microbial Pack PRO

Formulated with the original formula of Fastrack Microbial Pack, the Fastrack Microbial Pack PRO contains additional next generation ingredients to further promote bird health and production.

### Inhibodor

This concentrated formula binds to the ammonia produced by animal waste and reduces the risk of respiratory illness as well as reduces the odor.

For more information, contact your  
Conklin Independent Distributor

Upon placement, start with challenge dosing on days 1-4 once daily.

### Growing and Adult Maintenance

Agitate 6-8 oz. per 1,000 head of Fastrack Liquid Dispersible through water mediator system.

Mix 5 lbs. of Microbial Pack in ton of feed.

### Placement and Challenge

Agitate 8-10 oz. per 1,000 head of Fastrack Liquid Dispersible through water mediator system.

Mix 7.5 lbs. of Microbial Pack PRO in ton of feed.

### Inhibodor

Dilute two and one-half ounces of Inhibodor in water sufficient to evenly cover 1,000 square feet of litter.

See Product Spec Sheet for more information.
