DAIRY CATTLE PROGRAMS

The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

Fastrack Products

Fastrack Liquid Dispersible

This dispersible powder was created for calves to help improve their overall health by aiding the immune system and increasing nutrient absorption.

Fastrack Jump-Start™ Gel Ultra

Help establish a healthy gut microbiome from the start with specialized proteins and beneficial bacteria.

Fastrack NutriLift®

Formulated to help boost the immune system of calves with specialized proteins and beneficial bacteria.

Fastrack Microbial Pack PRO

Formulated with the original formula of Fastrack Microbial Pack, the Fastrack Microbial Pack PRO contains additional next generation ingredients to further promote animal health and production.

Fastrack Ruminant Microbial Gel Ultra

Help re-establish balance of beneficial bacteria, support and enhance immune function, and drive appetite.

For more information, contact your Conklin Independent Distributor

Birth

Administer 10 mL of Jump-Start™ Gel Ultra at birth between the gum and cheek of the calf.

Placement and Challenge

For calves administer 10 mL of Jump-Start™ Gel Ultra between the gum and cheek of the calf.

For cattle administer 15-20 mL of Ruminant Microbial Gel Ultra between the cheek and gum of the cow.

Weaning, Growth and Development

For calves and cattle undergoing stress, administer 15 mL of Ruminant Microbial Gel Ultra.

Top-dress TMR or grain diet with 1-2 oz. of Microbial Pack PRO per head per day.

Pre-Breeding and Breeding

When setting up heifers, cows or bulls for breeding including natural, artificial insemination, embryo transfer or any synchronized program, give an initial dose of 20 mL of Ruminant Microbial Gel Ultra.

Prior to the breeding season, top-dress the feed or mix into the TMR, 2-3 oz. of Microbial Pack PRO per head per day beginning 3-4 weeks before the planned breeding.

Lactation

Feed 1-2 oz. of Microbial Pack PRO per cow daily.
