SWINE PROGRAMS

The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

Try our progressive array of gels, microbial packs, treats, and other supplements that support overall health throughout all stages of your animal's life cycle.

Fastrack Products

Non-Ruminant Gel Ultra

Easy to administer, Non-Ruminant Microbial Gel Ultra is the combination of microbials and enzymes to aid with gastrointestinal health. Best used during sporadic eating periods, post-antibiotic treatment, and during times of stress.

NutriLift®

This dispersible powder was created for piglets to help boost their immune system with specialized proteins and establish a healthy gut microbiome in their first few days of life.

Liquid Dispersible

This dispersible powder was created for growing and adult pigs to help improve their overall health by aiding the immune system and increasing nutrient absorption.

Fastrack Microbial Pack PRO

Formulated with the original formula of Fastrack Microbial Pack, the Fastrack Microbial Pack PRO contains additional next generation ingredients to further promote animal health and production.
