- Miniature Equine

# EQUINE PROGRAMS

## The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your feeding program.

Try our progressive array of gels, microbial packs, treats, and other supplements that support overall health throughout all stages of your animal's life cycle.

## Fastrack Products

### Equine Microbial and Enzyme Pack

Specially formulated to provide lactic acid-producing bacteria, yeast metabolites, and enzyme-producing bacteria for protein, starch, fat, and cellulose digestion.

### Equine Gel Ultra

A kick of fast-acting microbial activity to help in times of stress. Fastrack Equine Gel Ultra supports the immune system and complements maternal antibodies when given to foals. Supplement prior to transportation to aid travel-related GI stress.

### Fortifier®

Packed with vitamins, minerals, yeast metabolites, antioxidants, and enzymes to support the needs of your horse during competition and times of stress. Additional ingredients aid joint health and decrease recovery time following strenuous training. Use in conjunction with Fastrack Equine Microbial & Enzyme Pack to maximize results.
